- ▶ Preferred: mattermost channel
- ▶ Email: mbse.praktikum@fortiss.org

Presentations - I

Status & Outlook

► Status

- What the team did in the last week

► Outlook

- What the team is going to do in the coming week
- Approach

► Organization

- Prepared by discussion with the whole team
- Presented by a different person each time (chosen internally)
- Duration: ~5 min

Presentations - II

Topic of the week

► Intention

- Discuss the relevant concepts/information required in the current (and future) tasks
- Trigger a discussion among team members

► Organization

- Topic and presenter are defined by the instructors the week before
- The whole team is invited to contribute to the preparation of the presentation
- Presenter reports about the topic and ideally becomes the contact point for such topic inside the group
- Duration: ~10 min

Presentation - Platooning Team

AF3 model

- ▶ Details of the following AF3 components
 - Lane Keeping
 - ??
 - Adaptive Cruise Control
- ▶ For each component
 - What (and how) Inputs it takes?
 - What does it do?
 - What outputs it produces?
 - Which sensors does it use?

Presentation - Parking Team

Lane detection and QR code reading

- ▶ Report about the existing code for lane detection and QR code reading
 - Architecture diagram describing the interaction between the main parts of the software
- ▶ Describe the interaction of this software with AF3
 - Which data does it take in input / send as output?
- ▶ Approach to deal with Scenario 1
 - What can be reused
 - What should be improved
 - What is missing
